On the occasion of 'Earth Day' (i.e 22/04/2021) our student chapter wanted participants to do something new and creative to challenge for everyone at home and reduce some waste. The event is named as 'Prakriti' and task to be performed is - participants have to take any waste material (plastic bottles, discarded glass bottles etc) and convert it into something beautiful and useful. The resultant container should be used to plant something in it(money plant, succulents, crotons, indoor plants etc). As it is easy to do and we took small steps altogether to combat climate change, global warming and boost the oxygen levels by our little contribution.
